### **Reasons for Allowance**

1. The following is an examiner's statement of reasons for allowance: none of the prior art of record discloses a method for dispensing flowable material from a dispenser comprising providing a dispenser having at least one chamber configured to contain the flowable material and membrane that seals the chamber, wherein the membrane contains at least one weld seam, applying force to dispenser to rupture the membrane along the weld seam; and dispensing the flowable material through the membrane. In light of the specification, weld seams are different from score lines or notches which form lines of weakness or weakened portions to facilitate rupture. Weld seams are defined as being formed by a first segment of injected molded material abutting a second segment of injected molded material. During the molding process, mold segments move toward and meet at an interface area (at the lesser thickness) at which a weld seam is formed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
